TYPE:
WORK FOR SOME DAYS AND LEFT THE WORK :

Question1 :

A can do a work in 15 days and B in 20 days. If they work on it together for 4 days, then the fraction of the work that is left is:

- a) $\frac{1}{4}$
- b) $\frac{1}{10}$
- c) $\frac{7}{15}$
- d) $\frac{8}{15}$
- e) None of these

Question2 :

A can finish a work in 18 days and B can do the same work in 15 days. B alone worked for 10 days and left the job. In how many days, A alone can finish the remaining work?

TITA

Question 3:

A can finish a work in 24 days, B in 9 days and C in 12 days. B and C start the work but are forced to leave after 3 days. The remaining work was done by A in:

TITA(Type In the Answer)

Question 4:

A and B can complete a work in 15 days and 10 days respectively. They started doing the work together but after 2 days B had to leave and A alone completed the remaining work. The whole work was completed in:

TITA(Type In the Answer)

Question 5:

A machine A can print one thousand books in 10 hours, machine B can print the same number of books in 12 hours while machine C print them in 15 hours. All the machines are started at 9 a.m. while machine A is closed at 11 a.m. and the remaining two machines complete the work. Approximately at what time will the work be finished?

- (a) 11:30 a.m.**
- (b) 12 noon**
- (c) 12:30 pm**
- (d) 2:20 pm**
- (e) None of these**

Type :

Question 6:

A and B together can complete a piece of work in 12 days. B and C in 20 days, and C and A in 15 days. A, B and C together can complete it in

TITA(Type In the Answer)

Question 7:

A and B can do a piece of work in 72 days. B and C can do it in 120 days. A and C can do it in 90 days. In how many days all the three together can do the work?

TITA(Type In the Answer)

Question 8:

A and B can do a work in 12 days. B and C in 8 days and C and A in 6 days. In how many days B alone can do this work?

TITA(Type In the Answer)

TYPE EFFICIENCY BASED

Question 9:

A is 30% more efficient than B. How much time will they, working together, take to complete a job which A alone could have done in 23 days?

- a) 11 days
- b) 13 days
- c) 20 days
- d) Data inadequate
- e) None of these

Question 10:

Sakshi can do a piece of work in 20 days. Tanya is 25% more efficient than Sakshi. The number of days taken by Tanya to do the same piece of work is:

TITA(Type In the Answer)

Question 11:

A takes twice as much time as B or thrice as much time as C to finish a piece of work. Working together, they can finish the work in 2 days. B can do the work alone in:

TITA(Type In the Answer)

**CONCEPT - LESS THAN DAYS
(EFFICIENCY DIFFERNCE)**

Question 12:

A is twice as good a workman as B and is therefore able to finish a piece of work in 30 days less than B. Find the time in which A and B can complete the work together

Question 13:

P is thrice as efficient as Q and is therefore able to finish a piece of work in 60 days less than Q. Find the time in which P and Q can complete the work together ?

Monkey Jump Concept

Question 14:

A and B working separately can do a piece of work in 9 and 12 days, respectively. If they work for a day alternately with A beginning, the work would be complete in:

- (a) $10 \frac{2}{3}$ days**
- (b) $10 \frac{1}{2}$ days**
- (c) $10 \frac{1}{4}$ days**
- (d) $10 \frac{1}{3}$ days**
- (e) None of these**

Question 15 :

A and B alone can do a piece of work in 8 and 18 days respectively. In how many days the work will be completed if they both work on alternate days starting with A?

A) $6 \frac{5}{9}$ days

B) 5 days

C) $10 \frac{7}{9}$ days

D) $10 \frac{9}{7}$ days

E) None of these

Question 16 :

P, Q and R can do a work in 20, 30 and 60 days respectively.

How many days does it need to complete the work if P does the work and he is assisted by Q and R on every third day?

(a) 30 days

(b) 25 days

(c) 15days

(d) 10 days

TYPE : MEN/WOMEN-“OR”

Question 17:

2 men or 3 women can do a piece of work in 16 days. In how many days can 4 men and 6 women do the same

TITA

Question 18:

If 2 men or 3 women or 4 boys can do a piece of work in 52 days, then the same piece of work will be done by 1 man, 1 woman and 1 boy in :

Question 19:

2 man or 3 women or 4 children can do a work in 20 days. In how many days will 3 men and 3 women can finish that work?

TITA

Question 20:

2 Men & 3 women completed a task in 12 days. If the women are at least half as efficient as the men, but not more efficient than the men, what is the range of the number of days for 3 women & 1 man to complete the same task?

- A. 16 to 17.5**
- B. 16.8 to 17.5**
- C. 15 to 17.5**
- D. 15 to 16.8 days**

TYPE :

MEN / WOMEN -“AND”

Question 21:

4 men and 6 women can complete a work in 8 days, while 3 men and 7 women can complete it in 10 days. In how many days will 10 women complete it?

TITA type

Question 22:

2 men and 3 women can together complete a piece of work in 4 days and 3 men and 2 women together can complete work in 3 days. In how many days 10 women will complete this work?

Question 23:

10 women can complete a work in 7 days and 10 children take 14 days to complete the work. How many days will 5 women and 10 children take to complete the work?

Miscellaneous Advance Set Question – Practice

Question 24:

A and B can do a piece of work in 30 days, while B and C can do the same work in 24 days and C and A in 20 days. They all work together for 10 days when B and C leave.

How many days more will A take to finish the work?

TITA

Question 25:

Time taken by P alone to finish a work is 50% more than the time taken by P and Q together. Q is thrice as efficient as R. If Q and R together can complete the work in 22.5 days, then how many days will P alone take to complete the work?

TITA

Question 26:

**“A” can complete a piece of work in 8 days ,while
“B” is 20% more efficient than him.A works for 2
days ,then B works for 1 day,and the cycle
continues like this.in how many days would the
work be completed?**

- A. $7\frac{3}{5}$**
- B. 7 days**
- C. $7\frac{7}{9}$**
- D. Not**

Question 27:

A & B together can do in 12 days which B & C together can do in 16 days. After A has been working for 5 days, B for 7 days, C finishes in 13 days. In how many days B could finish the work alone?

Question 28:

A can do $\frac{1}{4}$ of a work in 3 days and B can do $\frac{1}{6}$ of the same work in 4 days, how much will A get if both work together and are paid Rs. 180 in all?

1 : Rs 150

2 : Rs 100

3 : Rs 120

4 : Rs 160

5 : None of these

Question 29:

A does 80% of a work in 20 days. He then calls in B and they together finish the remaining work in 3 days. How long B alone would take to do the whole work?

a) 23 days

b) 37 days

c) 37 days

d) 40 days

e) None of these

Question 30:

A and B can together finish a work 30 days. They worked together for 20 days and then B left.

After another 20 days, A finished the remaining work. In how many days B alone can finish the work?

a) 45

b) 50

c) 54

d) 60

e) None of these
